PROFESSIONAL SUMMARY:

Software Developer with 2.5+ years of experience specialising in frontend development, UI/UX implementation, and full-stack web solutions. Proficient in React, Python, PHP, Flutter, HTML/CSS, and Node.js. Experienced in building responsive web platforms, cross-platform mobile applications, and RESTful APIs. Comfortable taking a feature from wireframe to production — bridging design intent and technical execution with precision.

TECHNICAL SKILLS:

Frontend Development

- React.js
- Flutter
- HTML5
- CSS3
- JavaScript
- Responsive Web Design
- Tailwind CSS

Backend Development

- Python
- Django
- PHP
- Node.js
- RESTful API Development
- Authentication & Role-Based Access Control

UI/UX Design

- Figma (Wireframing, Low & High-Fidelity Prototyping, User Flow Design, User Research & Usability Testing, Mobile-First Design)

Database & Infrastructure

- MySQL
- Hosting & Deployment
- Domain & DNS Configuration
- Website Maintenance & Security

Tools & Collaboration

- Git & GitHub
- Trello
- Agile/Scrum Workflow
- CI/CD Fundamentals

NON-TECHNICAL:

Communication & Presentation

I communicate technical concepts clearly to both developers and non-technical stakeholders. I'm comfortable presenting progress updates, proposing solutions, and writing documentation that keeps teams aligned.

Problem Solving & Critical Thinking

I approach challenges methodically — breaking down requirements, diagnosing bugs, and delivering solutions that are practical and maintainable. I'm comfortable working through ambiguity to reach clean, purposeful outcomes.

Attention to Detail

I take care to produce well-structured, readable code and pixel-accurate UI implementations. I consistently review my own work before handoff to minimise rework and maintain quality.

PROFESSIONAL EXPERIENCE:

Team Collaboration & Agile Workflow

I've worked in agile environments using Jira and Trello for sprint planning, task tracking, and team coordination. I've led a development team and collaborated across design, product, and backend roles — and I genuinely enjoy the energy of a well-functioning team.

Initiative & Ownership

I take full ownership of my work — from scoping through to delivery. I proactively flag blockers early and follow through to make sure things get done right, not just done.

Adaptability & Continuous Learning

I pick up new tools and frameworks quickly. I've worked across web, mobile, and backend contexts — and I've been able to adapt to whatever the project needs while continuing to grow my depth in frontend development.

Web Solutions Developer · *Lwegatech*

2025 – Present | Kampala, Uganda

- I design, develop, and maintain responsive web platforms for client organisations using PHP, React, and WordPress.
- I build and integrate RESTful APIs in Python to power dynamic frontend interfaces.
- I implement UI/UX improvements to ensure cross-browser compatibility and mobile responsiveness across all platforms.
- I contribute to hosting and ongoing security maintenance for live sites.
- I collaborate closely with stakeholders to translate business requirements into functional, polished web products.

Frontend Developer Intern & Project Team Lead · *Outdoorsy Uganda*

2024 – 2025 | Kampala, Uganda

A multi-functional hiking and outdoor adventure website developed during the apprenticeship programme to support hiking experiences, trip bookings, and merchandise sales within a unified digital platform.

- Contributed to frontend development and UI implementation for the platform website.
- Helped design responsive interfaces for hiking experience discovery and online booking workflows.
- Supported the integration of merchandise store functionality alongside tourism services.
- Participated in collaborative agile development processes, including sprint planning and iterative feature improvements.

- Focused on delivering an engaging user experience optimised for both desktop and mobile users.

KEY PROJECTS:

Jambo App — *Flutter · Mobile · Food Delivery Platform*

A cross-platform food delivery solution designed to connect customers, restaurants, and delivery riders through a seamless mobile experience. The platform includes separate interfaces for customers and couriers, with real-time order tracking and delivery management workflows.

- Designed complete wireframes and user journey flows covering onboarding, ordering, payment flow, delivery tracking, and order completion.
- Developed the full frontend architecture for both customer and courier mobile applications using Flutter.
- Implemented reusable UI components, navigation systems, and responsive mobile interfaces for scalability and maintainability.
- Integrated frontend systems with backend REST APIs to enable real-time data exchange and order management functionality.
- Collaborated closely with backend developers and project stakeholders throughout the agile development cycle.

Happy Hoe Grocery — *Python · Django · Inventory Management System*

A full-stack inventory and stock management system developed to support efficient tracking of products, inventory movement, and administrative operations for a grocery business environment.

- Built the backend system using Django with database-driven inventory management functionality.
- Developed dashboard interfaces for stock monitoring, product management, and operational reporting.
- Created REST API endpoints for frontend integration and system communication.
- Implemented authentication and role-based access control for administrators and staff users.
- Structured the system to support scalable inventory operations and real-time stock visibility.

EDUCATION & CERTIFICATIONS:

Refractory Academy · *Kampala, Uganda*

- Apprenticeship Programme (2024 – 2025) – 150 hrs technical training + 680 hrs Software Project Development covering OOP, TDD, Design Patterns, CI/CD, BDD, UI/UX, Refactoring
- Certificate in Software Engineering (September 2024) – 240 hrs covering Python, Django, HTML/CSS, Git/GitHub, Agile, Application Security, Human-Centred Design
- Product Management Certification (2025)

Bishop Cipriano Kihangire Secondary School

- Uganda Advanced Certificate of Education (UACE) – 2019

Gayaza High School

- **Uganda Certificate of Education (UCE) – 2017** Division 1
